

ADVANCED SCREENING SYSTEMS

EVOLV EXPRESS®

Evolv Express® is the world's first and only touchless security screening solution that meets all the post pandemic security screening requirements.

Evolv Express® is proven to operate up to ten times faster than traditional metal detectors with its single or dual-lane, free-flow entrances with a fusion of new sensor technology and artificial intelligence.

Evolv Express® offers a dual-lane, free-flow system proven to operate up to ten times faster than traditional metal detectors, alerting operators to the presence of weapons while ignoring harmless personal items like cell phones, keys, and coins.

The days of invasive weapons screening are over. Screening procedures that rely on metal detectors, hand wands, and invasive bag checks are slow and manual, resulting in uncomfortable, and unsafe, crowding.

Introducing the Evolv Express®

- Evolv Express® is the world's first and only touchless security screening solution that meets all the post pandemic security screening requirements.
- Evolv Express® is proven to operate up to ten times faster than traditional metal detectors with its single or dual-lane, free-flow entrances with a fusion of new sensor technology and artificial intelligence.
- The system can spot weapons while ignoring harmless personal items all while visitors simply walk through at a natural pace.

AI differentiates personal items from threats.

- Unlike traditional metal detectors, Evolv Express® uses advanced sensor technology and artificial intelligence to screen guests while they walk through at a natural pace—without stopping and without handing over their belongings.

- Evolv Express® offers a dual-lane, free-flow system proven to operate up to ten times faster than traditional metal detectors, alerting operators to the presence of weapons while ignoring harmless personal items like cell phones, keys, and coins.

See potential threats for faster issue resolution.

- When a potential threat is detected by the system, real-time image aided alarms show guards where the potential threat is located on a person or in his or her bag. This greatly reduces the amount of physical contact required and allows guards to act quickly and efficiently.

Prioritize the guest experience.

- Families and groups can enter your venue together without long lines and without invasive checks. It's a welcoming experience that maintains dignity and accelerates entry for your guests and employees while keeping venues and facilities safe from threats.

SPECIFICATIONS	DESCRIPTION
Dimensions: (WxHxD)	3320 mm x 1880 mm x 950 mm
Weight:	91kg
User Interface:	Tablet Display (396 mm)
Connectivity:	Voltage: 115VAC - 230VAC (+/-10%) Phase: Single Phase
Configurable Settings:	Multiple Performance Modes Multiple Operating Modes
